## School Report.

---

In presenting this our annual report of the schools, we take pleasure in saying that they have, during the past year, taken as a whole, been both successful and profitable. It has been our aim to secure good teachers and retain them through the year, and, with two or three exceptions, this has been done. We have had to increase the pay in some schools, in order to retain the services of our true and tried teachers. We realize, as members of the board of education, that efficient teachers are necessary, and that we have endeavored to employ the same. It is desirable that a teacher's education should be diffused over a wide space of time, and the depth of its foundation should be proportioned to the place she or he is willing to occupy. Teachers who intend to follow teaching as a business should spare no time or reasonable expense in preparing themselves for the work. They should be able to teach the higher English branches as well as the lower, and to give instruction in a practical and businesslike manner. A good teacher must know how to apply her knowledge to the best use of the pupil. Such teachers are, and always will be in demand.

We regret to say that during the past year, as in former years, there has been an apparent lack of interest in some of the schools on the part of the parents. It is the duty of the parents to look well to the education of their children. An hour or two cannot be more profitably spent than with your children in the school-room. Your interest would encourage them to be more punctual, and they would strive to attain a higher rank and a better record. Parents should not condemn teachers or denounce them publicly or privately, before they

have visited the school and satisfied themselves from personal observation that the evils complained of have some foundation in fact. They should not form hastily opinions from hearsay evidence of their children who are not always impartial witnesses in school matters, to say the least.

We have increased the school year three weeks, having held a spring and fall term of ten weeks each, and a winter term of six weeks. The attendance the past year, in some districts, deserves special mention, and shows an interest of the parents in those districts, in the education of their children. We recommend that more money be raised for the repairing of school-houses, as some of them need shingling, as well as other necessary repairs.

We think the time has arrived to place modern desks in the school-houses. They could be placed in one room a year and the expense would not be noticed.

Thanking the town as a whole for their help in making the schools what they are, we submit this report.

ELSIE A. WEED,

JOHN S. QUIMBY,
